

# **Research Study for Pancreatic Cancer**

## **Evaluating a New Biotherapy**

### **The Effectiveness of Opioid Growth Factor (OGF) in patients with adenocarcinoma of the pancreas**

**This study is conducted on patients who have failed previous treatment**

**Physicals, Blood work and Monthly 24-hour urine collection, Diary and Questionnaires are involved**

**To be in the study you must:**

- **Have failed previous therapy**
- **Have documented adenocarcinoma of pancreas**
- **Have laboratory values within range**
- **Have a CT scan within for 4 weeks**
- **Be willing to keep a daily diary**
- **Be physically active**

**Principal Investigator**                      **Jill P. Smith, M.D.**  
**Gastroenterology & Hepatology**  
**Hershey Medical Center**

**Sub Investigator**                              **Ian S. Zagon, Ph.D.**

**Contact**                                         **Sandra I. Bingaman, R.N.**  
**717- 531-8108**

***Costs of medication and office visits are paid by the study. There may be some costs incurred for Laboratory expenses***

**This research study has been approved by the Institutional Review Board, under Federal regulations, at Penn State's College of Medicine, Hershey Medical Center**
